

How many species can you spot . . .

. . . in the canopy and sky?

## Buzzard

Look out for this bird's distinct fan-shaped tail and listen for its cry like a cat.

From the depths of the deep gorge to the woodland canopy, Corrieshalloch is home to a wealth of natural habitats. Here are a few of the birds, animals and plants which can be seen.

## Long-tailed tits

Look for this tiny, fluffy bird with dark wings and a long tail along Lady Fowler's Fern Walk.

Don't be disappointed if you don't see everything at once, different creatures can be seen at different times of the year.

. . . amongst the trees and gorge?

## Wood warbler

Listen for the distinctive call, like a coin being dropped on a table, in the mature birch woodland in the upper reaches of the gorge.

## Raven

The largest of the crow family with a wingspan of up to 1.5m, you'll spot this intelligent and social bird nesting on the rocky outcrops of the gorge.

## What can you hear?

Pause for while and listen closely to the sounds of the forest. Birds and animals can be hard to spot but listening can guide you to their location.

## Treecreeper

This tiny bird climbs trees like a mouse, catching insects as they go. Once they reach the top of one tree they fly to the base of the next.

. . . on the forest floor?

## Red squirrel

This tiny, tufty mammal hides nuts in tree cavities or shallow pits that they dig into the ground to retrieve when food is scarce.

## What can you see?

Try sitting or standing still for a few moments and see what comes your way. Small birds, butterflies and other insects are likely to come closer if they don't see you moving!

## Speckled wood butterfly

Look for this butterfly in woodland clearings. Their spots are white on brown wings here but further south their spots are orange.

## Hart's tongue fern

The large shiny fronds of the Hart's tongue fern make them easy to identify. See if you can find this plant along Lady Fowler's Fern Walk as well as our other fern facts panel.
